Las puertas batientes son aquellas que se abren de manera convencional mediante bisagras ancladas a los laterales del mueble.

Hinged doors are those that open in a conventional manner by means of hinges anchored to the sides of the furniture.

Las puertas correderas abren de manera paralela al mueble mediante un sistema de sujeción por carriles (bien colgadas o apoyadas al mueble).

The sliding doors open parallel to the furniture by sliding system (either hung sliding or supported sliding system).

Las puertas “Union Mix” son ideales para puertas de pequeño tamaño y apertura batiente. Sus perfiles superior e inferior son más delgados que los de la puerta convencional.

The ‘Union Mix’ doors are ideal for small, hinged doors. Their top and bottom profiles are thinner than those of a conventional door.
